

**AALIM MUHAMMED SALEGH COLLEGE OF ENGINEERING**  
**AVADI - IAF, CHENNAI-55**  
**DEPARTMENT OF CIVIL ENGINEERING**

**Programme Educational Objectives (PEO's)**

<b>PEO1</b>	To proactively work as responsible professionals effectively discharging their duties in an independent or team environment in civil engineering or related fields.
<b>PEO2</b>	To pursue lifelong learning in furtherance of research or other specific career programs.
<b>PEO3</b>	To effectively address challenging problems in civil engineering or related fields by providing sustainable solutions using modern tools.
<b>PEO4</b>	To enable the graduates in gaining employment in industry and stabilize themselves as competent professionals in applying their technical skills in real time problems and meet the diversified needs of industry, academia and research.

**1. Programme Outcomes(POs) and Programme Specific Outcomes (PSOs) for the Institute**

**Programme Outcomes (Pos) Engineering Graduates will be able to:**

<b>PO1</b>	<b>Engineering knowledge:</b> Apply the knowledge of mathematics, science, engineering fundamentals and civil engineering specialization to the solution of complex civil engineering problems.
<b>PO2</b>	<b>Problem analysis:</b> Identify, formulate, review research literature, and analyze complex civil engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
<b>PO3</b>	<b>Design/development of solutions:</b> Design solutions for complex civil engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations .
<b>PO4</b>	<b>Conduct investigations of complex problems:</b> Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
<b>PO5</b>	<b>Modern tool usage:</b> Create, select, and apply appropriate techniques, resources, and modern engineering and modeling to complex engineering activities with an understanding of the limitations.
<b>PO6</b>	<b>The engineer and society:</b> Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional civil engineering practice.
<b>PO7</b>	<b>Environment and sustainability:</b> Understand the impact of professional civil engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
<b>PO8</b>	<b>Ethics:</b> Apply ethical principles and commit to professional ethics and responsibilities and norms of civil engineering practice.

<b>PO9</b>	<b>Individual and team work:</b> Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
<b>PO10</b>	<b>Communication:</b> Communicate effectively on complex civil engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
<b>PO11</b>	<b>Project management and finance:</b> Demonstrate knowledge and understanding of civil engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environment.
<b>PO12</b>	<b>Life-long learning:</b> Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

## 2. Programme Specific Outcomes (PSOs) for Civil Engineering

<b>PSO1</b>	To identify, formulate and solve civil engineering problems by applying knowledge of science, mathematics and engineering leveraging skills, techniques and various modern tools.
<b>PSO2</b>	To meet desired economic, environmental, ethical, and sustainability constraints while designing civil engineering system or elements.

## 3. Attainment of course outcome for Civil Engineering

The evaluation of a course outcome is based on students' performance in internal assessments, assignments, seminars, the university examination, and the course exit survey. For direct assessment, internal assessments, assignments, and student seminars collectively contribute 60% to the overall attainment of a course outcome, while the university examination contributes 40%.

Overall Direct Assessment evaluated as follows :

Weightage to Internal assessment, assignment, Seminar and University Examinations: 80%

Indirect Assessment evaluated as follows:

Weightage applied to Course Exit Survey: 20%.

### **Theory courses:**

The attainment of course outcomes by students is evaluated for each theory course through two internal assessment tests, model examination conducted by the department and an end-semester examination conducted by the affiliated university. These assessments are designed to shift students from "what they learn" to "how to deliver." They are direct methods used to determine a student's understanding of the subject, acquisition and application of knowledge, and problem-solving abilities. Additionally, assignments and seminars serve as direct assessment methods, fostering deeper thinking and greater engagement with the course material. Well-crafted writing assignments, in particular, encourage students to reflect more profoundly on their learning.

### **Lab courses:**

The attainment of course outcomes by students in lab courses is assessed through various methods: evaluating performance on individual experiments, a model practical exam conducted by the department, and the end-semester examination conducted by the affiliating university. These assessments, which include oral examinations (viva voce), determine the students' understanding of the subject, knowledge acquisition, ability to apply that knowledge, and problem-solving capabilities.

### **Project:**

The attainment of course outcomes by students on projects is assessed through three departmental reviews, a final project demonstration given by the student, and an end-semester examination conducted by the affiliated university. In addition to the main project in the program's final semester, students undertake mini projects in the seventh semester, supervised by faculty. During these projects, students apply their knowledge in field also industries.

Alongside these direct assessments, indirect assessments are also employed. These include course exit surveys to evaluate course and program outcomes, and student feedback forms to enhance the learning experience by reviewing content and course delivery.

## **4. Attainment of Course Outcomes of all courses with respect to set attainment levels**

### **Measuring Course Outcomes attained through Internal Assessments and University Examinations for Theory Evaluation:**

The Department has set Attainment level for the Course Outcomes of all courses in the internal assessments and university examination are defined for 2018-2022 batch as:

Academic Year	Attainment Level 1	Attainment Level 2	Attainment Level 3
2018-2022	Student scores between $\geq 50\%$ and $< 55\%$	Student scores between $\geq 55\%$ and $< 60\%$	Student scores $\geq 60\%$

### **Measuring Course Outcomes attained through Internal Assessments and University Examinations for Laboratory and Project Evaluation:**

The Department has set Attainment level for the Course Outcomes of all courses in the internal assessments and university examination are defined for 2018-2022 batch as:

Academic Year	Attainment Level 1	Attainment Level 2	Attainment Level 3
2018-2022	Student scores between $\geq 50\%$ and $\leq 59$	Student scores between $\geq 60\%$ and $\leq 69\%$	Student scores $\geq 70\%$

4. Assessment tools and process used for measuring the attainment of each of the program outcomes and program specific outcomes
5. Overall attainment including direct and indirect survey:
  - Weightage to direct assessment : 80%
  - Weightage to indirect assessment: 20%
